Race across the river using your memory to uncover a path!

It's the classic game of Memory but with a twist. Instead of taking tiles away when you make a match, you leave them in place revealed... the revealed tiles form a series of stepping-stones that players use to race across the river!

Players are trying to be the first to reach and unlock the temple on the far bank. The challenge for players with good memories is that their success makes things easier for the players following behind!
